T. Baker Smith 985-868-1050

Wayne J. Plaisance Engineers & Surveyors, Inc. 985-632-5596

### **Note:**

The parish Traditional HMGP requires DFIRM plus 1 foot for all elevations regardless of the zone. Request that the surveyor provide the DFIRM in the notes section.

### **General Information:**

In all cases, elevations in the V zone measure from the lowest horizontal cross member (i.e. the bottom of the slab) instead of the top of the first floor.

The Parish suggests that structures be elevated to one foot above the legal or program required limit in case of settling or contractor error. There may be insurance benefits as well since elevation certificates will be required in the future for flood insurance issuance.

The Parish does not recommend or endorse all or any of these vendors in any fashion. The list is a courtesy to facilitate applicant access to services.
