

Broaden your customer and hiring base by learning Spanish through Bayou Business Recovery Network

Is your business bilingual?

Would having an employee or two being able to speak Spanish allow your company to expand its customer base or operate more efficiently and effectively?

Join TEDA's Bayou Business Recovery Network for **Spanish for Real Life for Beginners**, an 8-week class meeting 6-8 p.m. twice weekly beginning March 7 at Fletcher Technical Community College. Classes will be conducted Monday and Wednesday evenings.

Basic conversation, verbal patterns, and useful phrases for daily life and work will be taught in small groups with the opportunity to engage with native Spanish speakers.

The Bayou Business Recovery Network offers educational seminars and on-on-one marketing, legal, financial, management and other forms of business assistance at no charge to businesses impacted by COVID-19.

To pre-register for the course, visit <https://www.tpeda.org/recovery-network> then click on "Register for Seminar Series" then click the link on the March 7 calendar entry. Registrants will receive an email including a link to a short four-page application required to complete enrollment. Should an applicant not receive the application, one can be downloaded by clicking "Learn More" at the same address. For further information or assistance, contact TEDA at 985-873-6890.
