LITTER ENFORCEMENT SIGN PROJECT PARTNERSHIP

In June 2026, Terrebonne Parish Consolidated Government partnered with Keep Louisiana Beautiful and the Office of the Lieutenant Governor to have litter enforcement signs placed on public property along roadways, boat launches, and other public sites in an effort to increase reporting and citations for illegal dumping and littering.

As part of its commitment to helping reduce litter and illegal dumping, the Department of Solid, Hazardous, and Recycling Waste worked with these partners to have signs installed in various locations. A total of 40 signs were placed at local roadways, boat launches, and recreational areas throughout the parish.

The goal of this project has been to keep litter enforcement and reporting information visible throughout Louisiana communities. As of the end of August, 102 simple litter and 22 gross litter citations have been issued statewide. The project has served to promote accountability and encourage residents to report littering and illegal dumping.

TPCG is looking forward to future partnerships that encourage residents to take pride in their community and be a part of the solution.
